MyACP System and Machines Configuration

MyACP Accounting and Control

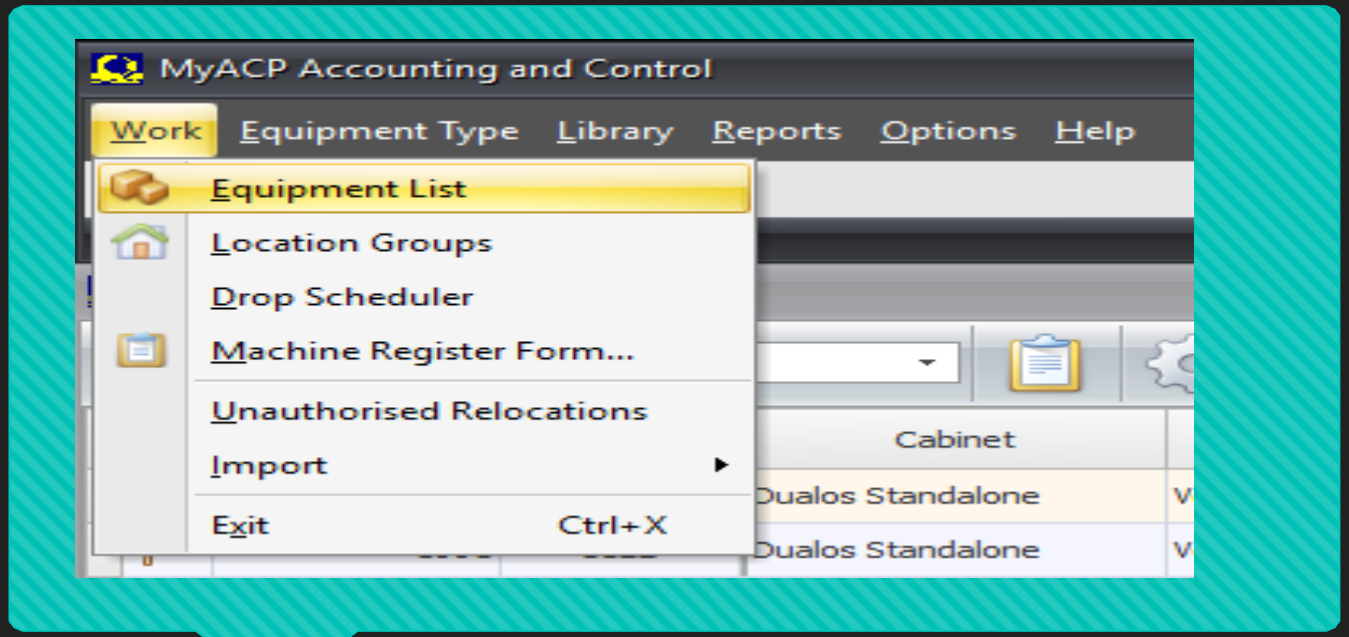

Technical Luke

January 21, 2025

Make sure the MyACP Accounting and Control Application has been installed on your Desktop

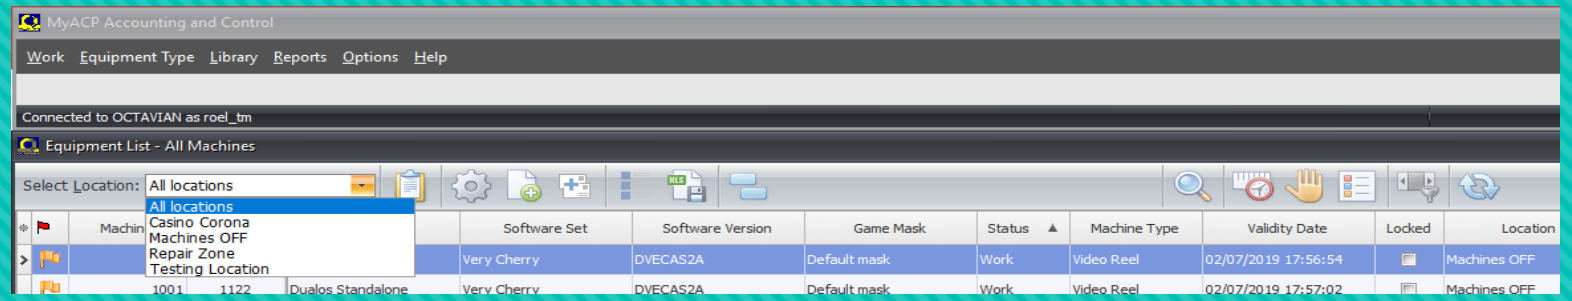

By connecting to the Database, you have to login your User and Password provided by IT Department.

By clicking the “Work” file, you will find the “Equipment List”

Equipment List - is the list of all machines identification that has registered into the MyACP that includes machine information and details.

There are categories that you need to look for.

- 1). Casino Corona - list of machines that are active/online on the Gaming Mass Floor.
- 2). Machines OFF - list of machines that were powered OFF and removed from the system.
- 3). Testing Location - areas where the machines takes place for testing.
- 4). Repair Zone - machines that where taken place for repair.

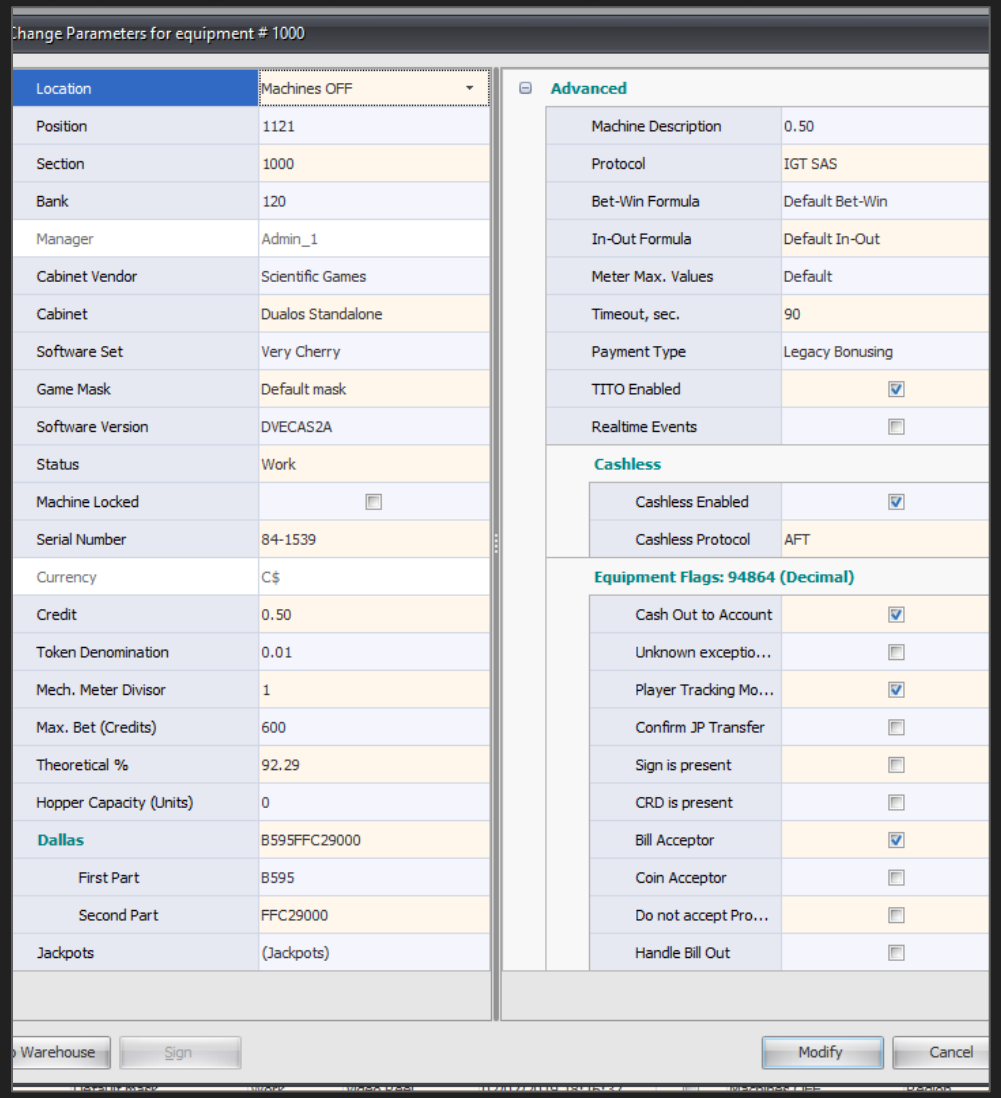

NOTE:

You have to select which category you need to modify in the system:

If you placing machine on Machines OFF, these are the steps in making machines under OFF status.

1). Under Position - copy first the machine number just in case you forget, followed by filling in the Section and Bank number.

2). By clicking “modify” will make changes in the system.

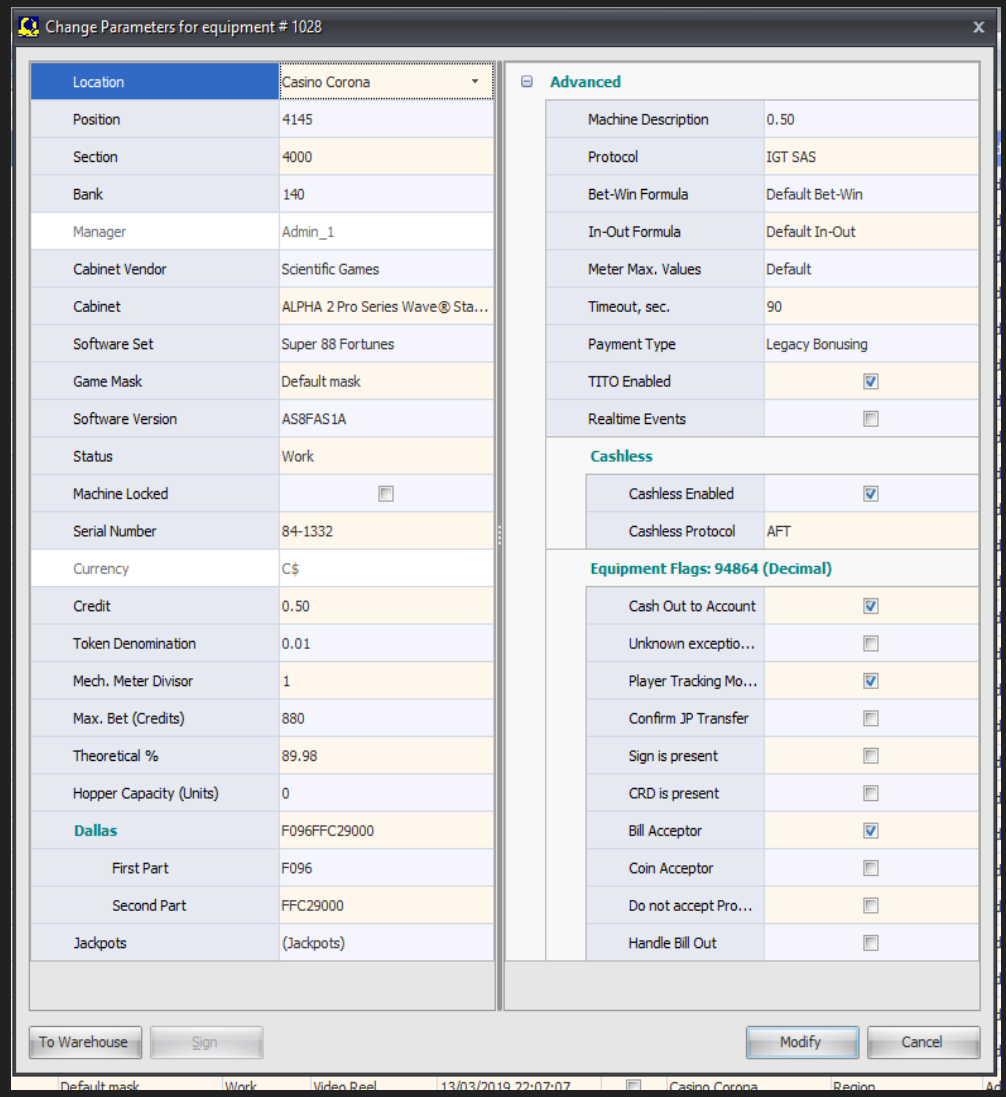

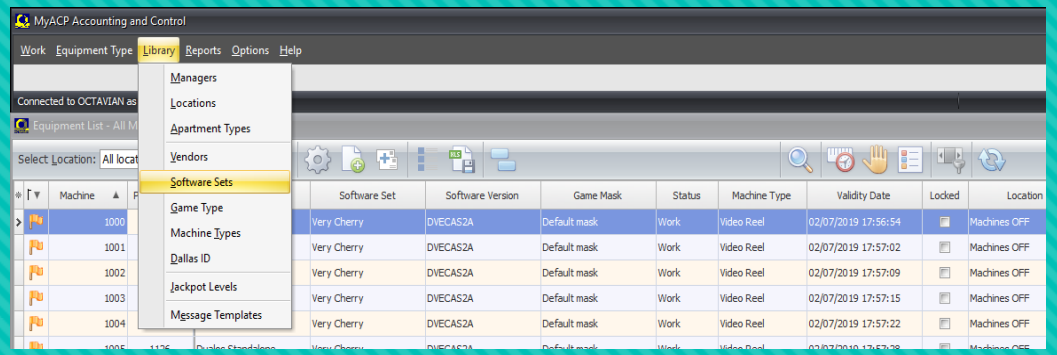

If you placing machine on Casino Corona, these are the steps in making machines under OFF status.

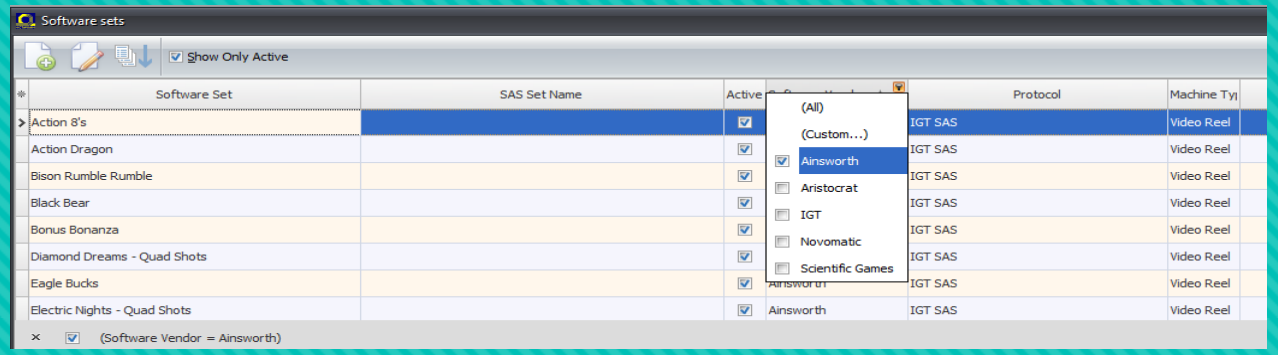

1). Under Position - copy first the machine number just in case you forget, followed by filling in the Section and Bank number

2). Make sure that the Dallas ID number are the same with the UCB number located inside the machine.

3). Credit and Machine Description are the same before you do the modification and later will show in the MyACP configuration.

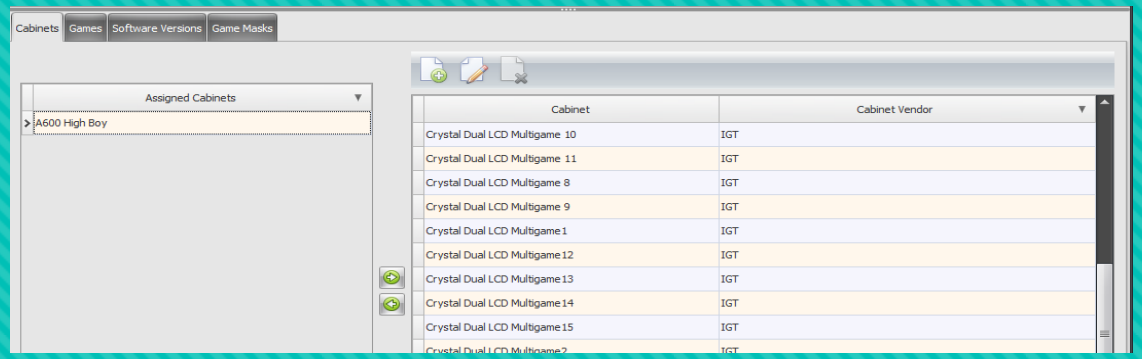

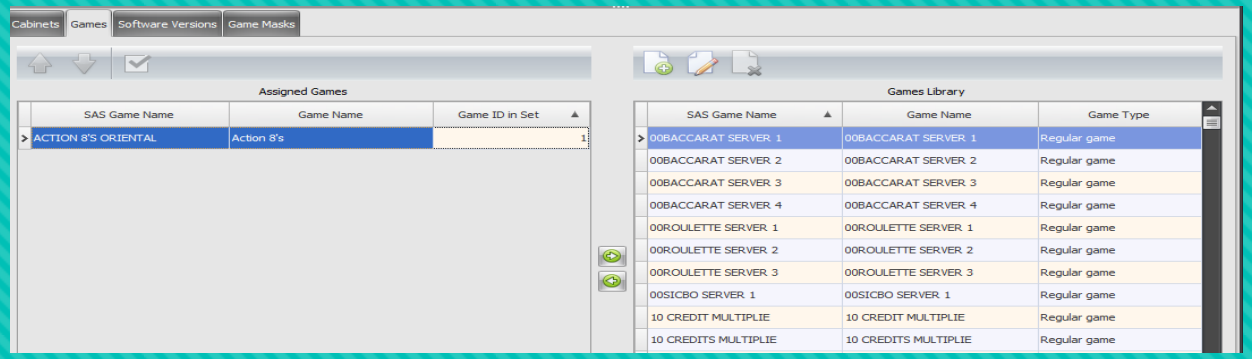

- If you are modifying/add/edit the configurations, please go to the "Software Sets" and select which manufacturer and game theme you want to change

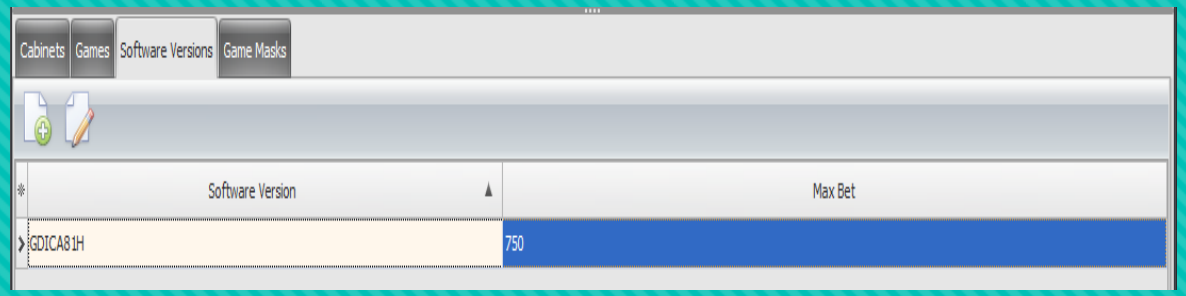

- Find the manufacturer and Game Theme you want to modify. Under the Software set, you can edit the game name.

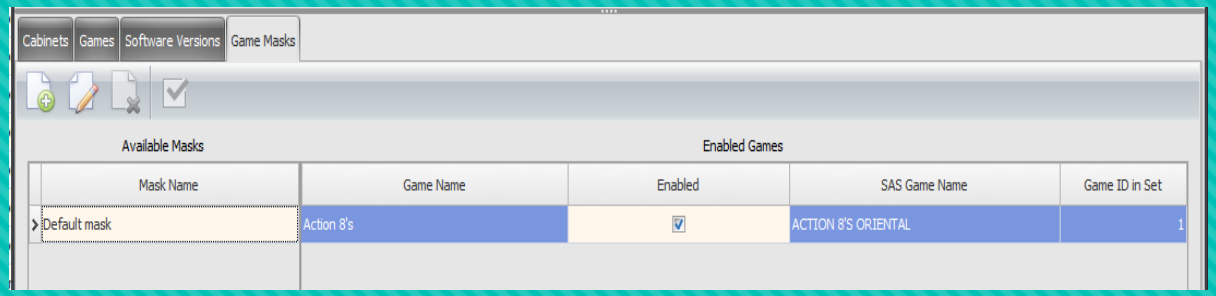

- Under “Cabinets” tab, once you have selected the manufacturer and you can identify which type of cabinet that the machine has by clicking the arrow left and arrow right.

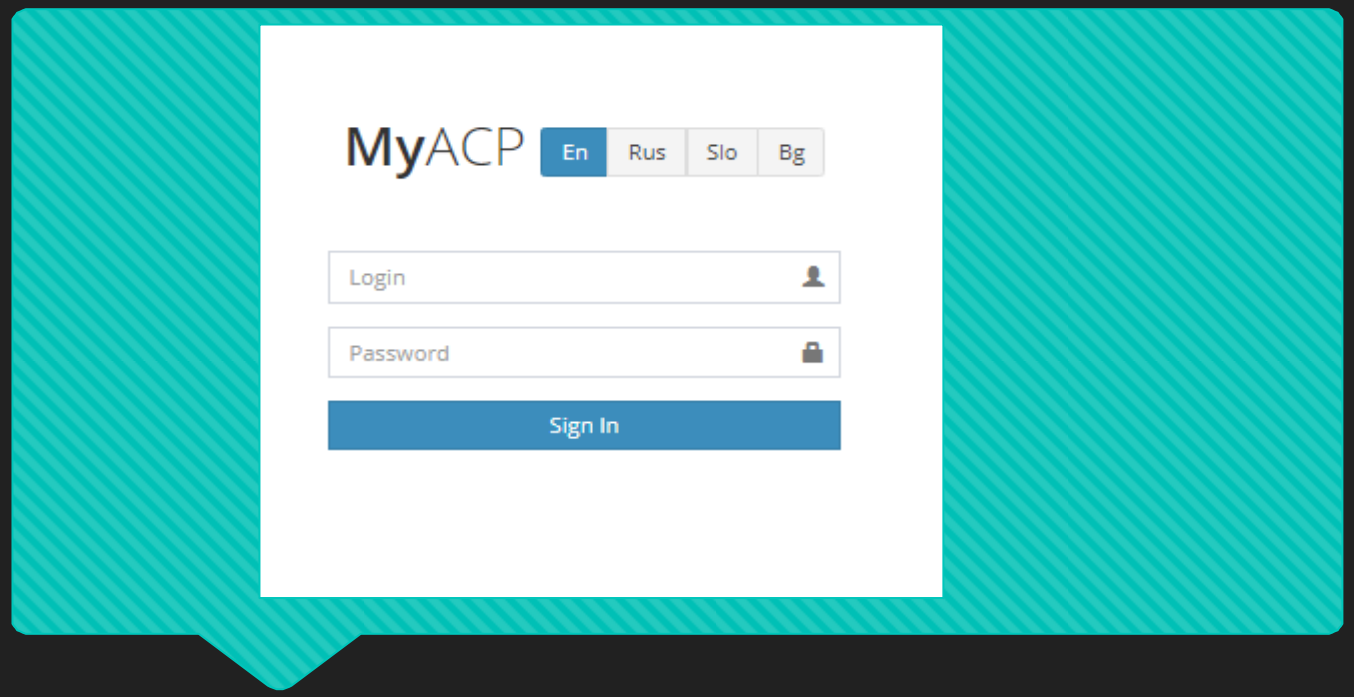

- Under “Games” tab, you can select the Game/s you want to modify. You can add or edit by clicking the arrow left and arrow right. That is the assigned games you want to modify.

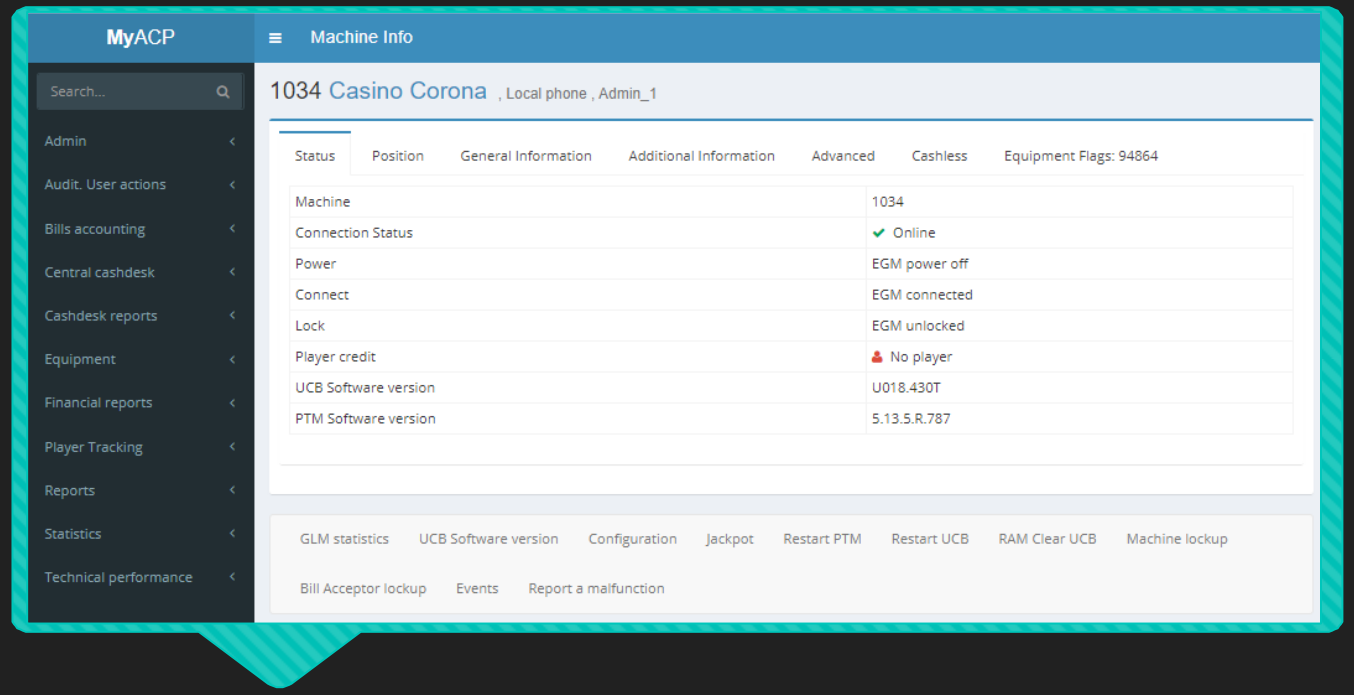

- Under "Software Versions" tab, make sure you input the correct software versions and the maxbet.

- Under "Game Masks" tab, see to it that the enabled games are selected to make available in the system.

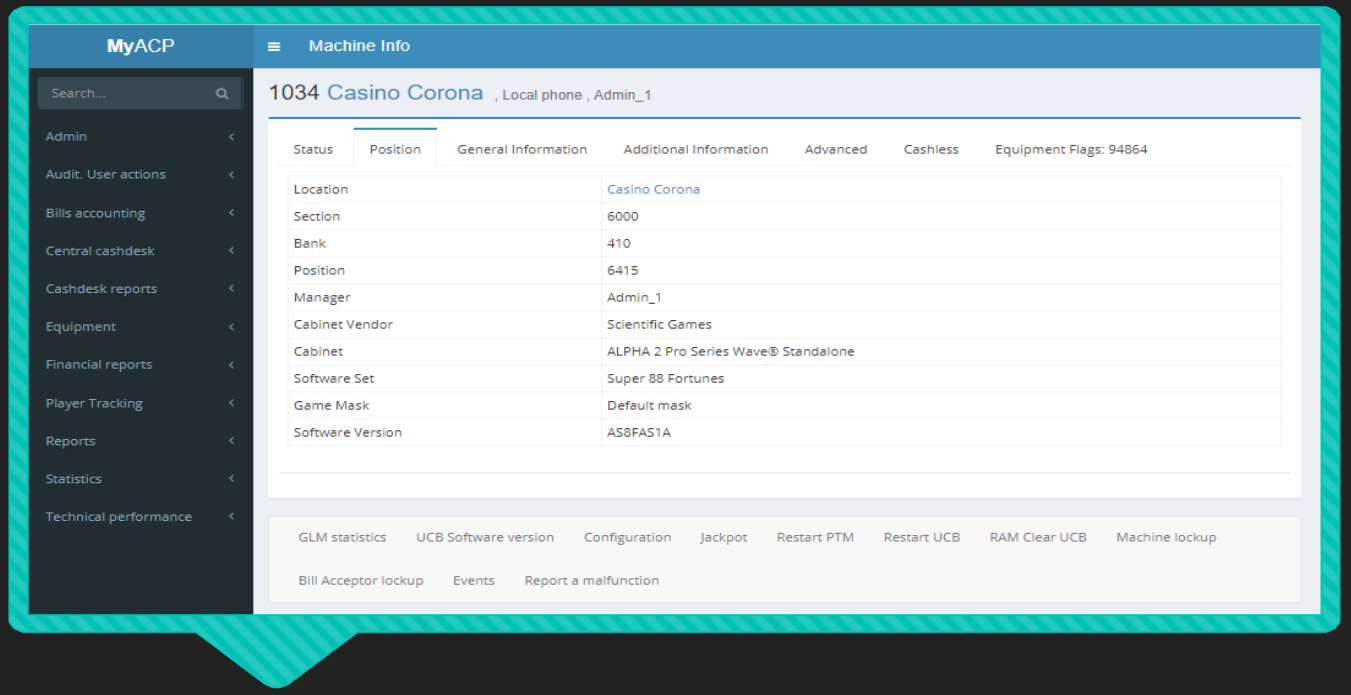

MyACP is a database wherein you can find the slot machines history, bills transactions, meters and accounting, significant events, locations, cash flow and overflows, tickets transactions.

You need to have the valid Login User and Password to access the MyACP.
